CENSUS OF BUSINESS

Fred A. Gosnell, Chief Statistician
William A. Ruff, Assistant

This volume contains a series of tables, giving a comparison of sales of identical firms for all retail stores reporting sales for both 1934 and 1935. Sales and stores, grouped into 11 business classifications, are shown for each state and county, and for cities of more than 10,000 population.

Included also is a series of summary tables, showing number of stores and sales of identical establishments, by detailed kinds of business for each state as a whole and for each city of more than 500,000 population.

The facts contained herein were collected by a complete field canvass of all retail stores in the United States by the Bureau of the Census with funds provided by the Works Progress Administration.

This report was prepared by J. Parker Bursk, Chief of Retail Trade Survey, assisted by Barbara D. Ross.

RETAIL TRADE SURVEY

The data presented in this volume were collected in the 1935 Census of Business. Reports of sales for the year 1934 were secured specifically for the use of the Retail Trade Survey, a project organized for the purpose of testing the feasibility and accuracy of sample censuses which might be taken in years other than those in which a complete enumeration was effected.

Extent of Coverage

The tables offer a direct comparison of sales for identical establishments in the years 1934 and 1935. Not all stores shown in the 1935 Retail Census reported sales for 1934. Some had inadequate records, some were not in business during that year and others for various reasons were unable to report sales for 1934. However, sixty-six percent of the stores reporting in 1935 also reported sales for 1934, and the sales of these establishments amounted to eighty-two percent of the total sales reported for 1935. The firms reporting sales for both years probably represent a larger proportion of total stores and sales for 1934 than for 1935. The period 1934 to 1935 was one of definite business improvement and, though no direct statistical evidence is available, it is probable that more new firms came into business in 1935 than disappeared during the period 1934-1935.

The reporting of sales for both years varied greatly between retail business groups, as is shown by Table I.

TABLE I
Percentage Comparison of Stores and Sales of Identical Firms in 1935 to Total Stores and Sales for 1935

Business Group	Percentage of Firms Reporting in 1935 Also Reporting 1934 Sales	Percentage of Total 1935 Sales Reported by Identical Firms
Total	66	82
Food Stores	70	83
Eating Places	56	72
General Stores	85	90
General Merchandise Stores	78	91
Apparel Stores	70	84
Automotive Group	57	77
Filling Stations	59	69
Furniture and Household Stores	72	86
Lumber and Building Material Dealers	80	86
Drug Stores	82	86
Other Stores	64	78

This variation bears a direct relation to the average size of establishment. For those groups with the largest average size store measured in terms of sales, the reporting for both years is highest; for those with the smallest average sales per store the reporting is least.

United States Summary.

For the United States as a whole the comparison of identical firms shows an increase of eleven percent from 1934 to 1935. The increases were not uniform for the various business groups. The largest increase was twenty-seven percent for the Automotive Group and the smallest five percent for Drug Stores. For detailed comparisons see the United States Summary table, Pages 66 and 67.

Regional Differences.

Increases in retail sales showed marked variation for different sections of the country. The greatest increase is shown in the Pacific states and the least in the Middle Atlantic states. Details of this comparison are shown in the United States Summary table, Pages 66 and 67.

City Size Differences.

Table II shows a comparison of the percentage increases in retail sales from 1934 to 1935, for cities over 500,000 population, for cities from 10,000 to 500,000, and for all areas of less than 10,000 population. An interesting feature of this table is that the largest increases have occurred in the least densely populated areas and the smallest increases in cities over 500,000 population.

TABLE II

Percentage Comparison of Sales for Identical Firms
For 1934 and 1935, By City Size

Kind of Business	Percent Increase in Sales, Cities over 500,000 Population	Percent Increase in Sales, Cities 10,000 to 500,000 Population	Percent Increase in Sales, Areas under 10,000 Population
Total	8	10	12
Food Stores	5	6	9
Eating Places	9	11	13
General Stores	15	8	8
General Merchandise Stores	7	8	5
Apparel Stores	6	7	6
Automotive Group	27	26	28
Filling Stations	4	5	10
Furniture and Household Stores	13	15	17
Lumber and Building Material Dealers	13	16	20
Drug Stores	2	5	7
Other Stores	5	7	10

Comparison of number of stores and sales published in Volume III of the Retail Trade Series, with similar figures in this volume may suggest a discrepancy. In many counties, there are fewer identical firms but the same volume of sales as shown in Volume III. This apparent contradiction arises from the fact that many stores had less than $500 of annual sales for 1935, and while they are included in the number of stores for 1935, their sales were not recorded. Generally such stores did not report sales for both years.

Composition of Each Business Group

Retail distribution, as covered in this Census, is the process of purveying goods to ultimate consumers for consumption or utilization together with services incidental to the sale of goods. The function of the retailer is primarily to anticipate the wants of the consumer and to make available, at the right time and at a convenient place, a reasonable selection of goods capable of satisfying those wants. The distinguishing characteristic of a retailer is that the business is done in a retail manner, in a place of business open to the general public.

The business classifications, although usually related broadly to the kind of merchandise carried, are not interchangeable with commodity classifications. For instance, grocery store sales are not exclusively sales of groceries; apparel stores sell accessories and shoes in addition to outer apparel; drug stores sell many lines other than drugs. Stores are classified according to their principal commodities or according to their popular designation. Dual-line stores, which could fall into more than one classification, are classified according to the kind of business which is the more important in terms of sales.

Food stores include 11 classifications shown in detail in the State summaries (pages 3 to 64) as follows:

Candy and confectionery stores
Dairy products stores (including milk dealers)
Egg and poultry dealers
Delicatessen stores
Fruit stores and vegetable markets
Grocery stores (without meats)
Combination stores (groceries and meats)
Meat markets
Fish markets - seafood
Bakeries and caterers
Other food stores

The classification "Bottled beer and liquor stores" which appeared in this group in the 1933 census is now included with "Other stores".

Eating and drinking places consist of restaurants, cafeterias, lunch rooms, lunch counters, refreshment stands and drinking places. Sales of the latter frequently include meals. Beer, wine and liquor in glasses, for consumption on the premises, are often sold in restaurants and other eating places as well as in those places classified as drinking places.

General stores (also called country general stores) are general merchandise stores which also sell a substantial proportion of foods. They are located typically but not exclusively in the smaller communities. In the 1929 census the food proportion of country general store sales, based upon a sample described in the reports of that census, varied from an average of 54 percent to 67 percent.

General merchandise group consists of department stores, variety (5-and-10 and limited price) stores, dry goods stores and general merchandise stores. The latter are stores selling a general line of merchandise in which food, if any, is a negligible item. General merchandise stores selling a substantial quantity of food are classified as general stores, regardless of where located. General merchandise stores exceeding $100,000 in annual sales are classified as department stores. The distinction between department stores and dry goods stores is that department stores sell a greater variety of merchandise than merely dry goods and women's apparel, usually including furniture or other household lines and men's lines, whereas dry goods stores appeal primarily or exclusively to women customers. A dry goods store becomes a department store if, and when, it adds furniture, household appliances, hardware and/or men's clothing and furnishings, provided its total sales exceed $100,000. If its sales are less than $100,000 per year it becomes a general merchandise store.

Apparel group includes the following classifications found in the State summaries:

Men's furnishings stores
Men's clothing and furnishings stores
Family clothing stores (men's, women's and children's)
Women's ready-to-wear specialty stores
Furriers and fur shops
Millinery stores (including leased millinery departments)
Custom tailors
Accessories and other apparel stores

Shoe stores

The classification "accessories and other apparel stores" includes corset and lingerie shops, hosiery shops, children's specialty shops, infants' wear shops, and mail-order houses engaged exclusively in the sale of apparel.

Automotive group (except filling stations) includes motor-vehicle dealers, used-car dealers, automobile accessories, tire and battery stores, repair garages, and other automotive retailers, including those selling airplanes and parts, boats (motor boats, yachts, and canoes) and trailers.

Filling stations are retailers primarily of gasoline and oil for the operation of motor vehicles. While gasoline and oil constitute their principal commodities, they may sell also such related commodities as tires, batteries and automotive accessories, and may operate lunch counters and tourist camps. Retailers exclusively of fuel oil for domestic household consumption are not included, but are classified as Fuel dealers and are included with "Other stores". Tourist camps whose principal revenue is derived from room rentals and/or the sale of meals, whether or not they sell gasoline and oil incidentally, are included in the Census of Service Establishments and are not in the Retail Census. In addition to filling stations, there are other retailers of gasoline and oil whose principal business places them in other classifications, such as grocery stores, farmers' supply stores and country general stores.

Furniture-household-radio group consists of five classifications found in the State summary tables as follows:

Furniture stores
Floorcoverings, drapery, curtain and upholstery stores
Household appliance and radio stores
Radio dealers (not selling household appliances)
Other home furnishings stores

Household appliance and radio stores are those whose principal business is the sale of electric or gas household appliances such as refrigerators, ranges, washing machines, vacuum cleaners, and other electrical appliances, or such appliances in combination with the sale of radios. Many stores in this classification are operated by gas and electric utility companies, primarily for the sale of appliances intended to increase the consumption of their gas and electricity.

Radio dealers are those principally engaged in the sale and care of radios, who do not also sell household appliances. Radio repair shops whose principal revenue is derived from services rather than sales are shown in the Service Census and not in the Retail Census.

The classification "other home furnishings stores" is identical with a similar classification in previous retail censuses and includes aluminumware and brush canvassers, antique dealers, lamp shops, etc.

Lumber-building-hardware group contains six classifications described in detail in the State summary tables as follows:

Lumber and building-material dealers
Hardware stores
Hardware and farm implement dealers
Heating and plumbing equipment stores
Paint, glass, wallpaper stores
Electrical supply stores

In using any of these classifications for market analysis it should be taken into consideration that it is extremely difficult to draw the line between wholesalers and retailers, particularly in the lumber and building-material field and to the lesser extent in the hardware field. If a dealer reports that he does more than 50 percent of his business at wholesale he is classified in total in the Wholesale Census, which sets out separately as related data the amount of his retail business, but does not deduct it from the dealer's total sales. Such retail sales of wholesalers (or those selling more at wholesale than at retail) do not appear anywhere in the Retail Census. Likewise, dealers doing some but not 50 percent of the business at wholesale appear in total in the Retail Census. In this particular field it is essential that both Wholesale and Retail data be taken into consideration.

The classification "Heating and plumbing equipment dealers" is not identical with the "Heating and plumbing stores" classification in the 1933 reports; nor is the classification "Electrical supply stores" identical with "Electrical shops" of 1933. Both differ by the inclusion in the 1935 Service Census of those electrical shops whose income for services was greater than the sale of merchandise, and by the inclusion in the 1935 Construction Census of some heating, plumbing and electrical contractors who were embraced in the 1933 Retail Census. Changes in the nature of the business resulting from renewed activity in home construction and repairs accounts for many of the shifts in classification. Under such circumstances a true measure of the status quo in 1935 is considered to outweigh the value of true comparability.

Drug stores include those with and without fountains (classified separately in the State summary tables) as well as leased drug departments in other stores, and direct-mail retailers of drug items.

Other stores group, in addition to including beer and liquor stores (packaged alcoholic beverages) combines the following classifications which are shown separately in the State summary tables (pages 3 to 64):

Bicycle shops
Book stores
Cigar stores and cigar stands
Florists
Fuel and ice dealers
Gift, novelty, souvenir shops
Hay, grain and feed stores (without groceries)
Hay, grain and feed stores (with groceries)
Farm and garden supply stores
Jewelry stores
Luggage stores
Newsdealers
Sporting goods stores
Others not specifically included elsewhere
Second-hand stores

RETAIL TRADE SURVEY

SECTION TWO - AREA TABLES FOR COUNTIES AND STATES

The principal contents of this Section comprise a series of tables showing the number of stores and volume of sales for identical establishments in each county throughout the United States, arranged in 11 business groups. The several detailed kinds of business making up each business group are described on pages xi to xiv.

Included in this Section is a convenient summary table containing the following data: Number of stores, and amount of sales, percent change in sales from 1934 and 1935, by geographical divisions and by States.

CENSUS OF BUSINESS, 1935
RETAIL TRADE SURVEY

TABLE B. - UNITED STATES SUMMARY NUMBER OF STORES AND SALES OF IDENTICAL ESTABLISHMENTS, 1934 AND 1935, BY KINDS OF BUSINESS, FOR DIVISIONS AND STATES

(Sales are expressed in thousands of dollars)
